X-Force Reporting System

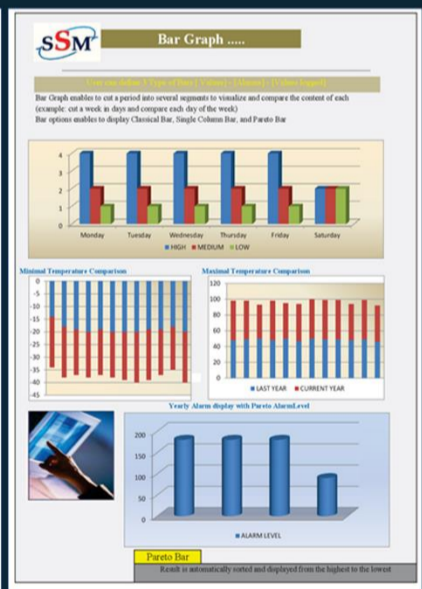

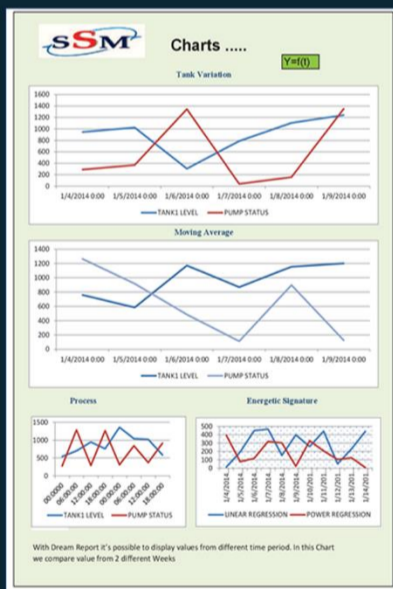

X-Force Reporting System is a fully functional database and reporting system to capture, store retrieve, analyse data in various reporting formats. X-Force Reporting System which helps in meeting the requirements of generating individual or consolidated reports in any format, at required intervals. These summarized reports are useful for analysis of the performance of the systems along with meeting the compliance requirements of ISO, NABL etc.

Benefits of XRS

- It is designed to be the simplest solution for reporting via extracting data from any available data source.
- Compliance and Performance Reports and Dashboards are great. But when there's a problem, you need the ad-hoc ability to drill into your data, select Tags, Pan and Zoom Trends, Export results for further analysis, anytime and anyplace. X-Force Reporting system delivers an access anywhere portal for that too. Empower everyone in your LAN with direct access to information.
- Built on today's modern technologies, X-Force Reporting fits perfectly for all types of reporting, from compliance to performance, efficiency, and maintenance reporting in discrete, hybrid and process automation markets.
- XRS makes information gathering and formatting so simple, you'll be generating the Reports you want, with the customized development facility provided by our SSM development team

Features

- Integrates all type of sources like DCS / Scada, OPC, Sql, Oracle, Odbc, Ms Access.
- Consolidation of reports which are in different formats.
- Provides data representation in form of Excel, SSRS, List-view, and Live Table Report.
- Extendable framework to accommodate project requirement.
- Web based application for easy accessibility from anywhere in organization securely.
- User administration and access control.
- Custom report designing, scheduling with Excel Add-in module.
- Schedule your reports and analytics notification via Email/SMS reporting.

SSM Automatic Statistical Table ...
--- Enables to display Calculated Statistical Values in table.
Way of data definition allows to user to make project development more intuitive and faster. ---
User can customize table looking (title, header, font color, back color, size and more...)
