

X-Force Calibration Management System

Every manufacturing plant has some sort of system in place for managing instrument calibration operations and data. Plant instrumentation devices such as temperature sensors, pressure transducers and weighing instruments – require regular calibration to ensure they are performing and measuring to specified tolerances. X-Force Calibration Management Software is one such tool that can be used to support and guide calibration management activities, with customized reporting system. Software that meets all your needs from scheduling to legacy history of internal and external calibration. Compliance with ISO and NABL standards.

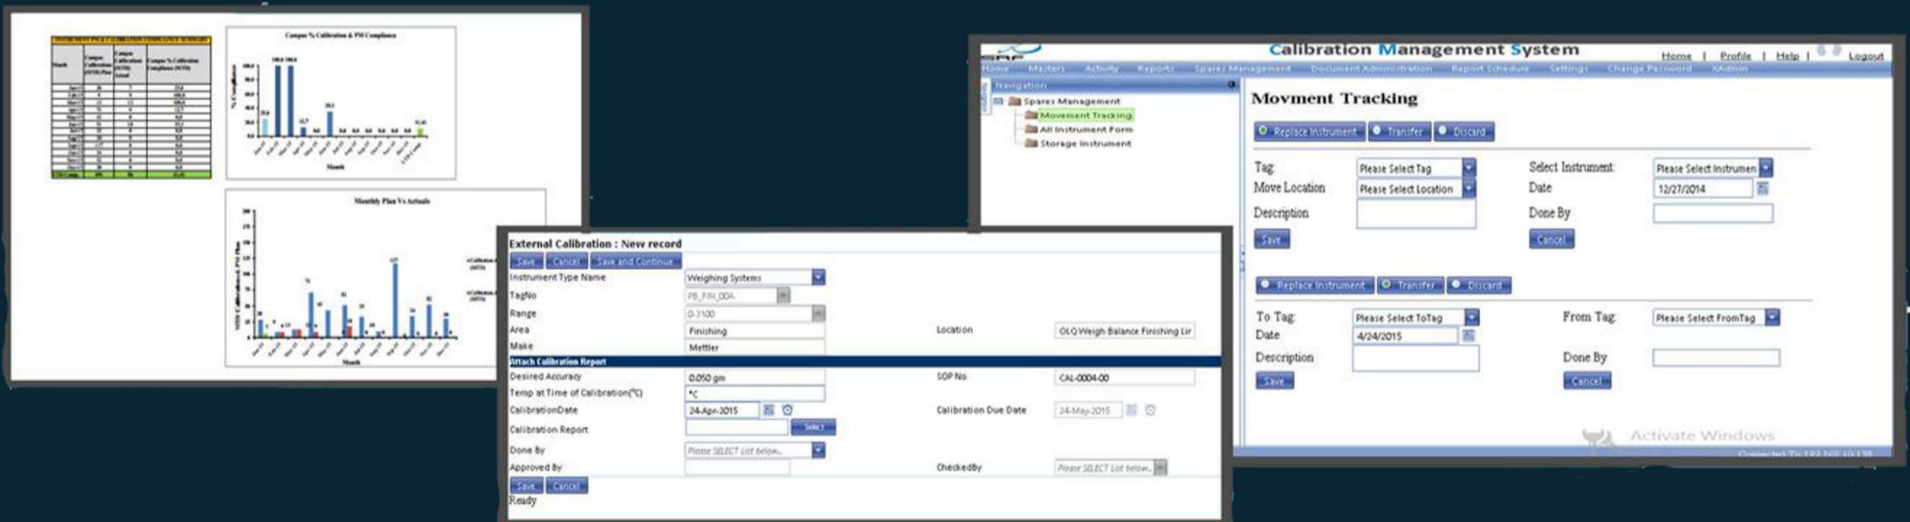

Benefits of XCMS

- Calibration Software improves calibration management tasks such as Planning & Decision-Making, Organization, Execution, Documentation and Analysis
- Cost reduction
- Quality improvements
- Increase in efficiency

Features

- Easily compliance with standards like ISO or NABL
- Notifications - Email to Instrument Area owner and technician for schedule on daily, weekly and monthly bases.
- Movement Tracking - Instrument life cycle from procurement, storage, In/Out of service and discard. - Laboratory Inward / Outward - External calibration inward / outward
- Scalability
- Label Generation
- Spares Management
- Reporting
- Security
- Integration with ERP
- IT friendly

XCMS USP: Legacy Software - Providing Reports According to Time Frame Format
